THE

FOUNDRY TRADE JOURNAL

(with which is incorporated THE IRON AND STEEL TRADES JOURNAL)

ESTABLISHED 1902

INDEX TO VOLUME LIV

January to June, 1936

Head Office:
49, Wellington Street, London, W.C.2

Index to Volume LIV

SUBJECT INDEX

A

Acetylene, Oxy-Acetylene Welding and Allied Industries, Twelfth International Conference of, 298, 452, 488.
Acid-Proof Enamelling on Cast Iron, 366, 445.
Air Compressor Faults, 316.
Alloy Cast Irons, 227.
Alloys, Heat-Resisting, 10.
Aluminium Alloy Castings, 388.
American Foundry Industry in 1935, Conditions in, 41.
American Foundrymen Honoured, 356.
American Foundrymen's Association, Annual Convention of, 307.
American Notes and Developments, 142.
Art and Craftsmanship, 350.
Ash and Sulphur, Simultaneous Estimation of, 146.

B

Babcock & Wilcox, Limited, Works of, 119, 435.
Balanced-Blast Cupola, 69, 170.
Belgian Foundry Industry in 1935, 46.
Bricks, Frit-Kiln, 143.
British Foundry School, 414.
British Industries Fair, Description of Exhibits, 156.
British Iron and Steel Federation, Annual Dinner, 240.
British Non-Ferrous Metals Research Association, Annual Meeting and Luncheon, 487.
British Oxygen Company's New Offices, 441.

C

Cast Iron and the Engineer, 497.
Cast Iron, Creep Properties of, 426.
Cast Iron for the Manufacture of Glass-Bottle Moulds, 171.
Cast Iron, Heat-Treatment of, 421.
Cast Iron, Influence of Special Elements on the Physical Properties of, 417.
Cast Iron in the Past Twenty-Five Years, The Development of, 261.
Cast Iron, Metal Moulds for, 74, 140.
Cast-Iron Pipes, 357.
Cast Iron, Recent Developments in, 190.
Cast Iron, Recent Developments in High-Duty, 23.
Cast Irons in Relation to Creep and Growth at Elevated Temperatures, Behaviour of Five, 381, 406, 426.
Cast Irons, Manufacture and Application of Modern, 191.
Cast Light Alloys and their Application in Motor Car Construction, Technology of, 420.
Castings for Electrodeposition, 83, 134.
Castings for Vitreous Enamelling by Sand Blasting, Preparation of Iron, 7.
Castings, Non-Ferrous, 231.
Castings, Some Points on the Modern Production of, 102, 178.
Census of Production and the Foundry Trade, 188.
Centrifugal Grey-Iron Castings in Water-Cooled Moulds, Production of, 13, 90.
Chilling, Technique of, 162.
Clay, Fundamental Properties of, 128.
Cochranes (Middlesbro') Foundry, Limited, Ormesby Iron Works of, 506.
Cold-Blast Pig-Irons, Properties of Genuine, 99.
Colouring Oxides are Affected by Variations of Enamel Composition, How, 125, 443.
Composition and Its Effect upon the Properties of Mould and Core-Sand Mixtures at Elevated Temperatures, 458, 502.
Contraction, 343.
Copper, Outlook for, 170.
Core-Drying Ovens, Recording Thermometer for, 84.
Core Materials at Elevated Temperatures, 64.
Core-Sand Mixtures at Elevated Temperatures, Composition and Its Effect upon the Properties of Mould and, 458, 502.
Coreshop Cost Reduction, 241, 289.
Coreshop Production, Modern, 279, 301.

Correspondence:—

All Round Prices, 414.
Blast Furnaces in the Black Country, 136.
British Trade in the Near East, 2.
Costing Report, Preliminary, 116, 152, 170.
Cupola Metal Temperatures, 170.
East Anglian Section, 314.
Employers' Co-operation, 98, 204.
Liquid Metal Temperatures, 222.
Metal Melting Costs, 244.
Moisture in Loam, 116.
Motor-Cylinder Bore Wear, 336, 378.
Oil-fired Furnaces, 98.
Perritts and the Follsain Process, 82.
Properties of Mould and Core Materials at Elevated Temperature, 2.
S.O.S., 64.
Stainless Steels, 378.
Sulphur Loss in Drillings, 204, 240.

Cost Reduction, Coreshop, 241, 289
Costing System, Works, 414.
Costs in the Foundry, Efficiency and, 338.
Creep and Growth at Elevated Temperatures, Behaviour of Five Cast Irons in Relation to, 381. 406, 426.
Cupola Operation, Control of, 117, 141.
Cylinder Blocks, Continuous Pouring of Ford, 12.
Cylinder-Bore Wear, Motor-Vehicle, 282.
Czecho-Slovakian Foundry Industry in 1935, 42.

D

Decarburisation Reactions, 324.
Design, Some Notes on, 308.
Die-Casting, 330.
Die-Casting, Present-Day Position of, 365.
Die-Castings, Practical Aspects of, 317, 387.

District Presidents:—

Delport, V., 316.
Hudson, F., 443.
Southcott, S., 472.

E

Efficiency and Costs in the Foundry, 338.
Eighteen-Eight, Properties of, 193.
Electric Arc v. Oxy-Acetylene Welding, 490.
Electric Furnace in the Cast-Iron and Brass Foundry, Possibilities of, 173, 212.
Electric Furnaces, 243.
Electric Steel in the Foundry, Manufacture and Utilisation of, 157, 214.
Electrodeposition, Castings for, 83, 134.
Electrolytic Iron, Recrystallisation of, 197.
Electrometric Analysis, 170.
Enamel Composition, How Colouring Oxides are Affected by Variations of, 125, 443.
Enamel Mill-Room Practice, 369.
Enamelling Industry and The Institute of Vitreous Enamellers, 22.
Enamelling Muffle Furnaces, Refractories for, 265, 372.

F

Foundry Equipment in 1935, 24.
Foundry Industry Month by Month, 34.
Foundry Labour, Control of, 305.
Foundry Lay-out, Up-to-date, 122.
Foundry Mechanisation, 33.
Foundry Products through the Microscope, 319.
Foundry Salesman, 337.
Foundry Trades' Equipment and Supplies Association, Annual Meeting, 252.
Foundryman of the Future, 328.
Fracture of Pig-Iron and Cast Iron, 363, 453.
French Foundry Industry in 1935, Economic and Technical Position of, 47.
Frit-Kiln Bricks, 143.
Furnaces, Electric, 243.
Furnaces in a Grey-Iron Foundry, Comparison of Some Melting, 3.

G

Gas for Vitreous Enamelling, Use of Town, 194, 269.
Gating of Castings, Some Notes on the, 326.
German Foundries in 1935, Position of, 50.
German Pig-Iron Trade in 1935, 146.
Glass-Bottle Moulds, Cast Iron for the Manufacture of, 171.
Glenfield & Kennedy, Limited, Works of, 437.
Grey-Iron Castings in Water-Cooled Moulds, Production of Centrifugal, 13, 90.
Grey-Iron Foundry, Comparison of Some Melting Furnaces in a, 3.
Grey Iron under the Microscope, 386.
Grinding Machine, Large Universal, 424.
Growth at Elevated Temperatures, Behaviour of Five Cast Irons in Relation to Creep and, 381, 406, 426.
Gunmetals, Recommendations for Two Leaded, 456.

H

Hammond Lane Foundry Company, Limited, Foundry of, 49.
Heat-Resisting Alloys, 10.
Heat-Treated Cast Iron in France, Some Applications of, 485.
Heat-Treatment of Cast Iron, 421.
Heterogeneity, 264.
Hollingdrake, Henry, & Sons, Limited, Development of, 446.

670.5 v.54

I

Income Tax, Useful Hints on, 420.

Institute of British Foundrymen:—

Annual Conference, Glasgow, 473.
Birmingham, Coventry and West Midlands Branch, Annual Dinner, 258.
Birmingham, Coventry and West Midlands, Annual Meeting, 304.
Costing Report, Branch Discussions on, 88, 108, 250.
Costing Sub-Committee, Some Criticisms of the Provisional Report of the, 161.
East Anglian Section Formed, 259.
East Anglian Section, Election of Officers, 452.
Edward Williams Lecture, 497.
Election of New Members, 82, 336, 501.
Lancashire Branch, Annual Dinner, 144.
Lancashire Branch, Annual Meeting, 310.
Lancashire Branch Visit Dagenham, 452.
London Branch, Annual Meeting, 323.
Members attending the Glasgow Conference, 496.
Newcastle Branch, Annual Meeting, 322.
Progress during 1935, 21.
Report of Non-Ferrous Sub-Committee, 456.
Scottish Branch, Annual Dinner, 68.
Scottish Branch, Annual Meeting, 249.
Sheffield Branch, Annual Dinner, 172.
Sheffield Branch, Annual Meeting, 340.
Sheffield Branch, Visit to Ketton Portland Cement Company, Limited, 308.
Wales, Monmouth and West of England Branch, Annual Meeting, 288.
West Riding of Yorkshire Branch, Annual Dinner, 177.
West Riding of Yorkshire Branch, Annual Meeting, 306.

Institute of Metals, Annual Meeting, 223.
Institute of Vitreous Enamellers, Annual General Meeting, 368.
International Combustion Company's Developments, 187.
Irish Free State's Largest Foundry, 49.
Iron and Steel Institute, Annual Meeting and Dinner, 379.

K

Kawaguchi—The Falkirk of Japan, 52.

L

Labour, Control of Foundry, 305.
Lang, J., & Sons, Limited, Works of, 438.
Leaded Gunmetals, Recommendations for Two, 456.

Leaders:—

Acetylene Welding Congress, 297.
Alloy Cast Irons, 413.
British Industries Fair, 151.
Cast Irons under Heat, 377.
Changes in the Midlands, 97.
Complete Coverage, 257.
Co-operation, Cost of, 169.
Corrosion of Cast Iron in Air and Water, 471.
Costing and Estimating, 115.
Custom of the Trade, 185.
Defence Proposals, 203, 221.
Development Organisations, 239.
Diminished Tolerances, 451.
Education Bill, 433.
Elasticity, 63.
Employer Co-operation, 97.
Employer Prospectuses, 433.
Examiners Examined, 1, 63.
F.B.I. and Tariff Policy, 495.
Glasgow Conference, 315, 471.
Hardy Annual, 133.
Industrial Research, 1.
Iron Roads, 277.
John Wilkinson, 495.
Key Industry Duties, 315.
Level Pegging, 355.
Liquid Metal Temperatures, 203.
Making History, 413.
Mechanised Production, 133.
Metallurgical Coke, 257.
Nebulosities, 277.
Overdue Improvements, 221.
Pro-Tempore Solution, 377.
Rearmament Programme, 335.
Re-Christening Cast Iron, 451.
Review of the Foundry Industry of 1935, 19.
Selling to the Dominions, 239.
Shortage of Managers, 151, 169, 185.
Smokeless Fuel, 81.
Spring and Autumn Conferences, 335.
Staff Unemployment Insurance, 297.
Stainless Steel, 355.
Topicalities, 115.

Leaves from a Foundryman's Notebook:—

Circular Work, 146.
Cores and Core Boxes, 365.
Moulding Typical Soleplates, 179.
Pattern Allowances, 216.
Splitting Loam Castings, 466.
Vertical Sweeping Methods, 244.

Light-Alloy Foundry Trade, Recent Developments in, 29.
Light Alloys, 140.
Light-Castings Industry in 1935, 28.
Lithuania, Iron and Steel Trade with, 171.
Loam Moulding, Plea for, 283.

M

Machine Moulding, 137.
Malleable Iron Foundry Industry in 1935, 31.
Manchester and District Ironfounders Employers' Association, Annual Meeting of, 136.
Marine Corrosion, 356.
Marine Cylinder, Moulding of a 3-Ton L.P., 193.
Meehanite Research Institute, 136.
Melting Furnaces in a Grey-Iron Foundry, Comparison of Some, 3.
Metal Moulds for Cast Iron, 74, 140.
Metallurgical Research, 56.
Mill-Room Practice, Enamel, 369.
Monel-Metal Welds, Hints for Making, 386.
Mould and Core-Sand Mixtures at Elevated Temperatures, Composition and Its Effect upon the Properties of, 458, 502.
Moulds for Cast Iron, Metal, 74, 140.
Moulds, Production of Centrifugal Grey-Iron Castings in Water-Cooled, 13.
Muffle Furnaces, Refractories for Enamelling, 265, 372.

N

National Physical Laboratory, Annual Report, 390, 464.
Netherlands East Indies, Trade Conditions in, 416.
New Zealand Steelworks Project, 252.
Nickel Industry in 1935, 36.
"Ni-Hard" in the Foundry, 318.
Non-Ferrous Castings, 231.
Non-Ferrous Foundry Industry in 1935, Condition in the, 25.
Non-Ferrous Metals in 1935, 54.

O

Oxygen in Cast Iron and Steel, 180.
Oxy-Acetylene *v.* Electric Arc Welding, 490.

P

Pig-Iron, Fracture of, 363, 453.
Pig-Iron Situation in 1935, 40.
Pig-Irons, Properties of Genuine Cold-Blast, 99.
Pipes, Cast-Iron, 357.
Portland Cement (Mechanical Processes), Manufacture of, 245.
Pouring of Ford Cylinder Blocks, Continuous, 12.
Powdered Metals, 329.
Propeller by Snap-Flask Methods, Making a, 415.
Pulverised-Fuel Firing Without a Pulveriser, 85.

R

Refractories for Enamelling Muffle Furnaces, 265, 372.
Refractories in the Foundry and Furnace, 101, 164.
Refractories Industry in 1935, 32.
Refractories, Recent Developments in, 58.
Refractories Research, 87.
Refractories, Steelmaking, 67.
Research, Recent Developments in Foundry, 35.
Richards & Company, Limited, George, Machine-Tool Foundry of, 65.
Rolls, Woven-Wire, 316.
Rotary Air Compressors, 466.
Rustless Steels in the United States, Production of, 423.

S

Salesman, Foundry, 337.
Salesmanship, Productive, 292.
Sand- and Shot-Blasting, 205, 341.
Sand-Blasting, Preparation of Iron Castings for Vitreous Enamelling by, 7.
Sand Control in Grey-Iron Foundries, Practical, 441.
Sand Mixtures at Elevated Temperatures, Composition and Its Effect upon the Properties of Mould and Core-, 458, 502.
Shot-Blasting, Sand- and, 205, 341.
Silicon, Photometric Estimation of, 64.
South Africa, Steel Agreement with, 140.
South African Engineering Industry Co-operation, 202.
Special Elements on the Physical Properties of Cast Iron, Influence of, 417.
Speculation in Metals, 278.
Spelter Outlook, Better, 186.
Sponge Iron, 73.
Spraying Apparatus for Vitreous Enamelling, 123, 198.
Steel Foundry Industry in 1935, 26.
Steel Castings, Production of, 155.
Steelmaking Refractories, 67.
Students' Corner, 300, 330, 342, 356, 428, 434.
Sulphur, Simultaneous Estimation of Ash and, 146.
Summers, John, & Sons, Limited, Works of, 209.
Sweden in 1935, Foundry Industry in, 43.

T

Telescope Castings, 278.
Tennent, R. B., Limited, Whifflet Foundry of, 153.
Test Pieces for the Iron Foundry, Some Special, 299.
Thermometer for Core-Drying Ovens, Recording, 84.
Thickness Gauge, Magnetic, 186.
Tin Bronzes at Elevated Temperatures, Some Tests on, 287.
Tin Corrosion Research, 364.
Tin, Difficult Days in, 442.
Tuyeres, Blast Furnace, 390.

V

Vitreous Enamelling by Sand Blasting, Preparation of Iron Castings for, 7.
Vitreous Enamelling, Spraying Apparatus for, 123, 198.
Vitreous Enamelling, Use of Town Gas for, 194, 269.

W

Weights, Problem of, 116.
Welded Steel Bedplates Applied to Large Gear Units, 416.
Welding, Progress in, 464.
West of Scotland Iron and Steel Institute, Annual Dinner, 150.

PUBLIC LIBRARY
DETROIT MICH.
